

AN APPEAL

Our institute is sixty years old! It has come a long way nurturing young minds while imparting value-based education and creating new benchmarks in academic excellence. It is with great satisfaction and pride that when we look at your prominence in the society that we realize our alma mater has crossed 60 years since its inception and all the good work has borne fruit. Your contribution to society is so remarkable that it will be unfair not to acknowledge it.

The college like in your times and even more now endeavors to impart high quality education to all classes of the society especially to the less fortunate. Covid 19 added an enormous and unexpected challenge to the otherwise stretched budgets of the parents and students. The college rose to the occasion by providing unprecedented concessions in scholarships and payment terms of fees. It is getting difficult to meet the crisis. Alone as at present the SIES, will not be able to cater but together we can!

In these six decades, the benches and desks that on which you sat on and “etched” your memories are begging to be replaced. The new generation needs to be introduced to the latest technologies to help them expand their skills and competencies.

On this diamond Jubilee year we count on our diamonds, that is you to come forward with your contribution of a token amount of Rs. 6000/- per unit of scholarship or larger amounts as personal endowments for bigger projects, like total class room renovation, enhanced facilities for students, etc. The list is endless. Development and progress has its own costs. It will also be great help if you can enroll your esteemed organization to help us with their CSR funds.

It's a time and opportunity to immortalize your alma mater and preserve it for many more generations to come. With your contribution it will grow from strength to strength. Looking forward to your assistance and joining hands with you to steer the COVID affected generation to greater glory and a brighter future.

Drops of water make an ocean they say. Every drop that we collect from you shall create oceanic difference in the lives of our future generation!
