To ensure effective data management and retrieval, we went carefully into several data storage, including SQL and NoSQL. Using modern tools and frameworks like go-micro resulted in improved development processes and increased system efficiency. In addition, I meticulously recorded significant technical details to establish a shared knowledge across the team. Throughout the development process, we prioritized performance optimization and scalability considerations. Simultaneously, I improved my awareness of distributed systems and service mesh principles while honing my abilities in Linux systems and scripting automation.

DESCRIPTION OF THE ORGANIZATION

ISF stands Innovative Solution Framework that uses disruptive & emerging technology. ISF Analytica & Informatica Pvt. Ltd. As an Information Technology organization has understood the Small & Medium Enterprises requirements and configured its services towards benefiting today's SMEs. This Organization was founded by Tapan Das at 2018.

ISF offers SME's a full range of consulting, solutioning and product development services using emerging technologies like block chain, big data, cloud, AI & Deep Learning, M2M & IoT. ISF's main focus has been on BFSI, EduTech, HealthTech, AgriTech & Real Estate sectors.

In financial terms, SME's still today find it difficult to come up with a proper mix of financing for its operations as it is not able to balance between loans from banks and investments by investors. What we as a financial advisor call that it is all about WACC i.e. weighted average cost of capital. So the conversion of business concept to strategy to operations, which should take a full circle, is not happening and as a result of this many SME's are facing with the problem of closing down before even it moves to the next level of growth.

CERTIFICATE OF INTERNSHIP

This is to certify that Ms. Manpreet Kaur Pawar, student of SIES College of Arts, Science & Commerce (Autonomous), Roll No FMSC2324231, has successfully completed the Internship Programme from 21 January 2024 to 20 May 2024 in Shankar Mahadevan Academy.

Shankar Mahadevan Academy runs a charitable music education program named Inspire India Project under CSR (corporate social responsibility) funding from a Foundation. Under this program, the Academy teaches music to children and youth from the underprivileged sector at little cost. One of the requirements specified by the program sponsor is for the Academy to submit MIS (management information systems) data, every quarter, on progress made by students in the music education program. Using only manual systems and basic apps such as MS Excel, this reporting of information would take us 6 manweeks of effort.

Manpreet helped us reduce that time by half. She distinguished her internship with her ability to create systems that meet the needs of the Academy's operations. Her use of functions in the app to extract and place data in the prescribed formats saved us weeks of effort in the statutory reporting of the MIS data.

The same systematic approach was in full view in the manner she manages the scheduling of classes to teachers, and in the way she established a communication system between teachers, program coordinators, and students. Her prompt documentation of discussions, meetings, and action plans help us keep track of special events and initiatives under our program.

Manpreet is a musician too. And it is interesting how she combined her musical and systems abilities to set routines that assist students in learning and practising music compositions.

We wish her lasting success in any initiative she undertakes in her promising career.

Sincerely,
